PROFESSIONAL SUMMARY

Full-stack developer experienced in production-ready projects with strong problem-solving and fast adaptation skills. Skilled in developing modern web applications using React, Laravel, and Spring Boot, with a focus on code quality, maintainability, and effective technical communication within teams. Specialized in complex data modeling, test automation, and up-to-date software architectures (OOP, SOLID, layered structure). A results-oriented team player who delivers tangible outcomes.

TECHNICAL SKILLS

Frontend: React, Redux, JavaScript (ES6+), jQuery, HTML5, CSS3, Tailwind CSS

Backend: PHP (Laravel 12), Java (Spring Boot), RESTful API, JWT, Spring Security

Database: PostgreSQL, MySQL, SQL, JPA/Hibernate, Eloquent ORM

Testing & Automation: Cypress, Selenium, Jest, Testing Library, PHPUnit, JUnit

Tools: Git, GitHub, Docker, Postman, Composer, NPM, VS Code, IntelliJ, Bash

Principles: OOP, SOLID, MVC, KISS, DRY, Layered & Component-based Architecture, Responsive Design

EXPERIENCE

Full Stack Developer Intern

Jun 2024 – Jan 2025

Workintech

Remote

- Developed scalable, production-grade full-stack projects using React, Spring Boot, and PostgreSQL.
- Took responsibility in refactoring processes to improve code quality and test coverage.
- Actively participated in code reviews, daily stand-ups, and sprint reviews within agile team environments.
- Implemented best practices in multi-layered architecture and RESTful API design.

Software Developer Bootcamp

Feb 2025 – Mar 2025

Insider & Testinium Tech Hub

Remote

- Refactored existing modules and added new functionalities using React and JavaScript.
- Developed full-stack solutions for backend integration, data flow, and API consumption.
- Contributed to software quality through code reviews and live technical discussions.

PROJECTS

Todo Application

Laravel 12 | MySQL | React | Tailwind

<https://github.com/Tayfun-Senturk/todo-project>

- Enhanced user experience with category and priority-based task management, filtering, search, and statistics panels.
- Implemented drag-and-drop (Kanban) support, dynamic form validation with Formik & Yup, and easy setup with Docker Compose.
- Established end-to-end tests and CI/CD pipeline across all application layers.

E-Commerce API System

Spring Boot | PostgreSQL | JWT

<https://github.com/Tayfun-Senturk/ecommerce-api-backend>

- Role-based authentication, product/order management, and modern RESTful API with Swagger documentation.
- Achieved high test coverage through comprehensive automation tests.

Library Management Application

Java | SQL

<https://github.com/Tayfun-Senturk/library-management-system>

- Improved performance with authorized user management and optimized database queries.

LED Matrix Control System

ESP32 | Unity

<https://github.com/Tayfun-Senturk/led-matrix-bluetooth-display>

- Real-time 8x8 LED matrix control via Bluetooth and interactive mobile UI built with Unity.

Portfolio Website

React | Tailwind CSS

<https://tayfunsenturk.vercel.app/>

- Multilingual support, dark mode, and mobile-first design for personal branding.

EDUCATION

Kocaeli University

2020 – 2024

BSc in Biomedical Engineering (GPA 3.16)

Istanbul University

2023 – 2025

Associate Degree in Computer Programming

CERTIFICATES & LANGUAGES

Full Stack Developer Certificate – Workintech

2025

Insider & Testinium Tech Hub Bootcamp

2025

English – C1 (EF SET)
